Summary

I am a software engineer with experience in Desktop, Mobile and Web applications. I have over 14 years of experience building with numerous versions of the .Net Framework, including 5 years with NodeJS and 6 years with PHP. In addition, I have many years of experience building with prominent front-end languages and CMS frameworks (HTML, CSS, and JS).

Experience

Senior Software Engineer

GCS (Gulf Coast Solutions)

May 2021 - Present (7 months +)

Responsible for the full-stack development of various applications using .NET and ReactJS.

Senior Software Engineer

Kaden Health

Feb 2021 - May 2021 (4 months)

Assisted in the completion of a Video Conferencing app for mental health patients.

The application used Laravel(PHP), ReactJS, MongoDB, and OpenVidu API. As well as speech analysis and machine learning techniques to assist the therapist by identifying important moments of the session.

Senior Software Engineer

ChopDawg.com

May 2020 - Jan 2021 (9 months)

Worked with a team of contractors on various projects, primarily using, NodeJS, Laravel, ReactJS, and SQL. Led the development of a blockchain application that utilized smart contracts interacting with smart home devices.

Technical Lead

Oct 2019 - May 2020 (8 months)

Working with a great team of professionals to deliver a solution for workplace safety. The product utilizes wearable technology to precisely identify task-based risk for cumulative trauma (overuse injuries) through characterization of muscle demand physiology.

The application utilizes a Bluetooth connected IOS device to transfer data to our NodeJs/SQL backed and the results can be viewed on our frontend SPA build using ReactJS.

Senior Software Engineer

Lextech Global Services

May 2019 - Sep 2019 (5 months)

Responsible for the support and development of a PHP Laravel single page web application. While I was primarily responsible for backend development, I also assisted in frontend enhancements and some Mobile support.

The application was used to manage an at-home dry-cleaning delivery service, it uses Stripe api for payments and a proprietary route management api.

Senior Developer

Merge Design & Interactive

May 2017 - Apr 2019 (2 years)

Assisted in the development of multiple brochure websites built using modular architecture using various content management systems. Using HandlebarsJS, ReactJS, SQL, Wordpress, Kentico CMS, NodeJS, and ASP.NET.

Senior Software Engineer

Orthogonal

Nov 2013 - May 2017 (3 years 7 months)

Working with a great team of medical software professionals, building exciting applications for industry leaders using an array of languages, including .NET, , NodeJS, PHP, Ruby, Swift, Java, SQL, ReactJS and AngularJS.

Assistant in the development of multiple mobile applications that captures and displays data from medical devices over Bluetooth LE.

Software Developer and Trainer

Virtual OfficeWare Healthcare Solutions

Oct 2007 - Nov 2013 (6 years 2 months)

Introduced a C# ASP.NET MVC web application that runs automatic compatibility tests on Crystal Reports against multiple versions of Centricity EMR. I introduced an ASP.NET MVC web application that uses C# & VB to convert medical intake forms into HTML & CSS. I also conducted monthly 3-Day end-user training classes with healthcare professionals

Education

Penn State University

Information Technology

2003 - 2007

Skills

.NET • JavaScript • Web Applications • OOP • Design Patterns • React.js • Node.js • Amazon Web Services (AWS) • Microsoft Azure • Agile Methodologies
