SUMMARY

I'm a skilled software engineer with 15+ years of experience building Mobile, Web, and Blockchain applications. My proficiency in .Net, Solidity, and JavaScript, combined with my expertise in leading front-end frameworks like ReactJS, enables me to deliver high-quality solutions. My recent focus within the Web3 development community reflects my commitment to embracing new challenges and advancements. I'm also venturing into AI and Machine Learning, as I believe these technologies are the future of software engineering.

EXPERIENCE

Product Engineering Manager | ZeNFT, Inc. | January 2022 - Present | 100% Remote

- Managed a team of engineers while overhauling the product development workflow, implementing advanced agile methodologies, and optimizing system architecture, which doubled productivity.
- Collaborated with cross-functional teams to build and design advanced blockchain products and services to meet customer needs while bringing technical expertise to the table.
- Built and deployed a secure NFT Marketplace using the Seaport protocol, saving over 80% in blockchain gas cost.

Senior Consultant Software Engineer | Various Companies | April 2019 - January 2022 | 100% Remote

- Assisted various startups in the development and delivery of over 5 applications as a full stack engineer writing low-level and high-level code.
- Utilized numerous bleeding-edge technologies and APIs, such as speech and facial analysis to measure emotional health and wearable tech to monitor workplace safety. Building with ReactJS front-end, and NodeJS or Laravel PHP backend.
- Developed, tested, troubleshooted, and maintained a music/video distribution platform and NFT marketplace using EtherJS, ReactJS, NodeJS, and PostgreSQL.
- Collaborated closely with product, design, and engineering teams to ensure successful delivery.
- Industries included: Dry Cleaning Delivery, Music Distribution, Work Place Safety, Project Management, and Healthcare

Senior Developer | Merge Design & Interactive | May 2017 - April 2019 | 100% Remote

- Assisted in designing and developing multiple brochure websites built using modular architecture and various content management systems. Using HandlebarsJS, ReactJS, SQL, WordPress, Kentico CMS, NodeJS, and ASP.NET.
- Contracted with several large companies and organizations to help develop their online/mobile presence.
- Increased website traffic by 240% and improved time-to-page load by 45% by implementing modern SEO and CSS optimizations.

Senior Software Engineer | Orthogonal | November 2013 - May 2017 | Chicago, IL

- Working with a great team of medical software professionals, building exciting applications for industry leaders using various languages, including .NET, NodeJS, PHP, Ruby, Swift, Java, SQL, ReactJS, and AngularJS.
- Assisted in developing multiple mobile applications that capture and display data from medical devices over Bluetooth LE.
- Developed and implemented software architectures that improved the security and performance of web applications, resulting in a 50% reduction in latency times and a 20% improvement in overall system stability.

Software Developer and Trainer | Virtual Officeware | October 2007 - November 2013 | Pittsburgh, PA

- Introduced a C# ASP.NET MVC web application that runs automatic compatibility tests on Crystal Reports against multiple versions of Centricity EMR.
- Created an ASP.NET MVC web application that uses C# & VB to convert medical intake forms into HTML & CSS, which reduced support calls by 45%.
- Conducted monthly 3-day end-user training classes with 100+ healthcare professionals.

EDUCATION

Information Technology

Penn State University • 2007

SKILLS

Industry Knowledge: AWS, Mobile Applications, Web Applications, Agile Methodologies, OOP, Design Patterns, HL7 Standards, Healthcare Information Technology (HIT), SPA, jQuery Mobile, Kentico

Tools & Technologies: Node.js, Smart Contracts, .NET, TypeScript, JavaScript, C#, SQL, HTML 5, CSS, Swift, Objective-C, PHP, Visual Studio, Crystal Reports, Entity Framework, XML
